

Up to **16 SEER PERFORMANCE**

# **GSX16** HIGH-EFFICIENCY AIR CONDITIONER

## ENERGY EFFICIENCY

As the owner of an efficient **McQuay**® brand GSX16 R-410A Air Conditioner, you have made one of the best purchasing decisions possible in the HVAC marketplace. At **McQuay** we strive to build heating and air conditioning equipment that offers high performance, energy efficiency, durability, and an environment-complementing design – all at a price that will have you saying **“Thank goodness for McQuay.”**

In particular, your **McQuay** brand GSX16 Air Conditioner will provide you with reliable cooling and money-saving energy efficiency levels as compared to lower SEER air conditioner units.

## COMFORT. SAVINGS. PERFORMANCE.

### ENJOY THE COMFORT

You can count on your **McQuay** brand GSX16 Air Conditioner to keep you cool on even the hottest summer days. Your **McQuay** brand air conditioner starts with a high-performance compressor that operates in tandem with our high-efficiency coil. The coil is made of rifled refrigeration-grade copper tubing and corrugated aluminum fins in a design that maximizes surface area. These high-quality components together cool your home effectively.

### QUIET YOU CAN COUNT ON

We know that the last thing you want to hear at night is a noisy air conditioner starting up. So, we build our **McQuay** brand GSX16 Air Conditioners with sound-dampening features that help ensure that your cooling system doesn't interfere with a good night's sleep. We rely on a quiet condenser fan system and a unique louvered sound-control top – to reduce fan-related noise. Your **McQuay** brand GSX16 Air Conditioner will keep your home cool and comfortable, year after year.

**McQuay's SMARTCOIL™ 5mm tube condensing coil design optimizes the heat transfer ability of R-410A refrigerant compared to standard 3/8" copper tubing.**

### SMARTCOIL™ TECHNOLOGY SMALLER IS SMARTER

Long ago the HVAC industry determined that the combination of copper tubing and aluminum fins provided the most efficient transfer of thermal heat available. Today, the **McQuay** brand has improved upon this industry standard by making the condenser coil copper tubing smaller and smarter. The result is an air conditioner unit that can offer high-efficiency, use less refrigerant, and deliver money-saving and energy-saving comfort to you for years and years.

### R-410A REFRIGERANT

Compared to the lower SEER R-22 refrigerant units, your new **McQuay** brand GSX16 Air Conditioner system will not only provide you with money-saving cooling performance for many years, but it also features the R-410A refrigerant. This refrigerant does not contain chlorine.

Introduced in 1995, the R-410A refrigerant has helped increase the durability and reliability of air conditioner compressors.

## **IMPRESSIVE FEATURES AND BENEFITS:** **McQuay® BRAND GSX16** R-410A HIGH-EFFICIENCY AIR CONDITIONER

- Chlorine-free R-410A refrigerant
- A high-performance, high-efficiency compressor
- 5mm SmartCoil™ condenser coil in select models
- A factory-installed liquid-line filter drier
- A high-efficiency condenser coil made of corrugated aluminum fins and rifled refrigeration-grade copper tubing
- A three-bladed fan and a louvered sound-control top – all of which add up to quieter system performance
- A louvered cabinet made of heavy-gauge galvanized steel that protects the coil, while its appliance-quality, post-paint finish resists the effects of weather and time
- An attractive design, finished in an architectural gray color that complements any home environment
- AHRI certified
